

Our fiber optic preparation equipment employs advanced cleaning methodologies, guaranteeing a pristine optical fiber surface and thereby enhancing fusion splicing performance.

By moving light rather than liquids, the in-situ fiber optic UV system of the Opt-Diss 410 removes the need for filters, tubing, and syringes, saving time, labor, and costs, while enabling near real-time data ...

Find professional-grade fiber optic termination kits equipped with visual fault locators, strippers, and precision tools for network setup.

Semi-automatic fiber-stripping machines enable precise and efficient processing of coated, buffered, and jacketed glass fibers. Designed for reliability and repeatability, these machines ensure high-quality ...

With its simple, one button operation, this device cleaves an optical fiber in a fast cut cycle time of one to four seconds.

The Agilent Cary 60 fiber optic UV dissolution system performs in-situ UV dissolution analysis. Dedicated probes are automatically lowered at each sample timepoint.

The Opt-Diss 410 brings dissolution measurement directly to the vessel, eliminating the need for manual or automated sampling along with the associated consumables, labor, and off-line analysis. Service ...

Advanced Fiber Optic Tool Kit, ACS Plus Series Slitter for Armored & Heavy-Duty Cables, MB04-7000 Flat Drop Cable Slitter, MSAT#174; 16 Series Mid-Span Fiber Access Tool, CFS-3 Series 3-Hole Fiber ...

Fiber strippers are precision tools that reliably and cleanly remove a defined length of coating (often 30-40 mm) from a fiber end so that the bare glass is exposed without scratching or nicking it.

Choose from our selection of fiber optic wire and cable strippers, including electrical wire strippers, electrical cable strippers, and more. Same and Next Day Delivery.
