

Optical Power Meter Infrared Integrated Unit

HPL220IR infrared optical power meter is a wide spectral line infrared optical ...

YIXIST Technology Co., Ltd. is a smart device tech company that specializes in making spectrometers and optical power meters, ensure that we continue to maximize value for our customers.

The large wavelength range of the optical power meter enables working in both the visible and infrared range without switching. The precise, logarithmical output signal is ideal for optical alignment systems.

Our handheld optical power and energy meters are plug and play compatible with our wide range of calibrated optical sensors for the highly accurate and repeatable optical measurements required in ...

Displaying measurements from pW to kW's and pJ to hundreds of Joules, StarBright measures power, single shot energy, repetitive energy, frequency, and beam size with Ophir's wide range of thermal, ...

HPL220IR infrared optical power meter is a wide spectral line infrared optical power meter, which is mainly used to measure the power density of infrared radiation, that is, the radiant energy power per ...

Laser Power Meters are ideal for measuring the energy output of laser beams for testing or laser system applications at Edmund Optics.

Laser Sensors Make accurate laser power measurements, from the deep UV to the infrared, with calibrated, traceable laser power sensors from Coherent.

Powered by LaserPoint technology, these meters are available as integrated meters that connect directly to a computer's USB port as well as stand-alone power detector heads that connect to a ...

By using a simple RS232 interface, the device can be used alone or in parallel with other devices to measure or monitor optical power. The Smart Detector Head has a fast response speed, wide ...

Measures irradiance and integrated power Measures light from various wavelength UV-LEDs by replacing the sensor head Other sensor heads can be used with one controller. (Sensor head lineup: ...
