

Optical cable pre-twisted wire clamp equipment

ZION Communication focuses on optical fiber cable hardware products, offering FTTH and ADSS series solutions--including stainless steel, nylon, and ...

Meanwhile we accept customization!Product description:The suspension clamp of ADSS optical cable is mainly used for the suspension cable on the overhead self-supporting ADSS optical ...

Composition: Each set of pre-twisted wire tension clamp components includes: inner stranded wire, outer stranded wire, and pull ring. Users can configure and purchase other connectors according to ...

Pre-twisted OPGW clamps provide a safe, reliable, and fiber-friendly solution for OPGW and other line applications, ensuring long-term stability and enhanced safety in various conditions.

Pre-twisted suspension clamps are used for suspension and support of optical cables on linear towers. The cable clamp is used to transmit axial load and disperse radial compressive stress, which plays a ...

It is not only suitable for aerial optical cables, but also for anchoring and installation of aerial wires, stay wires, etc., as well as for use as traction clamps in optical cable construction.

The suspension cable clamp, through the combination of inner and outer pre twisted wires, can effectively protect the optical cable, avoid bending stress, and provide protection and auxiliary ...

Made of galvanized steel wire or aluminum clad steel, preformed into the process when prefabricated beam, inner wall layer of emery stick, and enhance the friction between clamp and cable.

Full range of models and specifications: Full range of fiber suspension clamp models and specifications, including power optical cable fittings, composite ground cable fittings, and pre-twisted wire fittings for ...

The product is suitable to connection between optical cable and tensile tower in OPGW optical cable erection, which is used for protection and auxiliary damping of OPGW optical cable.
