

PLC (Planar Lightwave Circuit) Splitters are Single-mode splitters with an even split ratio from one input fiber to multiple output fibers. This PLC Splitter is a 1*8, with 1 input and 8 output fibers with an even ...

Engineered with advanced planar lightwave circuit technology, our splitters ensure uniform signal splitting, low insertion loss, and excellent stability--even in demanding network environments.

MT-Link 1+8 Single-mode Planar Lightwave Circuit Splitter (PLC type) are developed based on unique silica glass waveguide process with reliable precision aligned fiber pigtail in a miniature package, it ...

Our DYNAMIX Circuit (PLC) splitters are specially designed for Fibre Optic Distribution Network applications. The PLC splitters are available in the form of bare type, compact component type, & ...

PLC splitter, or the Planar Waveguide Circuit splitter, is a passive device to divide one or two optical signals to multiple signals uniformly or combine multiple signals to one or two optical ...

High-performance PLC fiber splitters for reliable signal distribution. OEM customization and private labeling for global network solutions.

PLC splitters are split or combine light from one or two incoming fibers to multiple numbers of outgoing fibers having 1 or 2 input channels and up to 64 output channels. They perform uniformly over a wide ...

With the great technologies in optical research and production, Seifree gathers a number of optical talents on fiber communication, which ...

1*8 PLC Splitter divides or combines a signal inputs to 8 outputs. ...

Learn everything about PLC Splitter: what they are, how they work, and how to source the right one for your network. Complete buyer's guide.

PLC-18SC - Fibre 1*8 Optic PLC Splitter With SM FC SC ST LC Fibre Connector is in stock. This PLC splitter is a micro-optical element using photolithographic techniques to form optical waveguide at ...

1*8 PLC Splitter divides or combines a signal inputs to 8 outputs. 1xN PLC splitters are precision aligning process to divide a single optical input (s) into multiple optical outputs uniformly, while 2xN ...

Corning's QuickPath(TM) PLC optical splitters reduce insertion loss and deliver high performance. These devices enable more effective monitoring and management of optical networks. They are available ...
