

CANGO specializes in providing top-notch PZ30 metal distribution box to our customers.

PZ30 modular terminal combination electrical appliance is a device for installing terminal electrical appliances. Its main features are the modular size of electrical appliances, track-based installation, ...

This product has the characteristics of modular component size, rail-based installation, artistic appearance, and safe use. It can be mounted on the wall or embedded, and can be operated and ...

PZ30 distribution box is suitable 50HZ, 500V and below, load current is not greater than 100A single-phase and three-phase circuits.

PZ30 series flush type and surface distribution boxes/distribution boards are mainly used in the circuit Of AC 50Hz, rated voltage 220V/380V, and acted to install the ...

The cabinet is available in six standard sizes, 8-bit, 10-bit, 13-bit, 16-bit, 20-bit and 23-bit, one bit for each single-level switch.

PZ30 series flush type and surface distribution boxes/distribution boards are mainly used in the circuit Of AC 50Hz, rated voltage 220V/380V, and acted to install the modular combination equipment.

The series products are made of standard cold-rolled steel and use powder-coating techniques to process the crust. The outlook is beautiful and fit for surface and flush install.

The distribution box incorporates advanced features such as earthing terminals, neutral bars, and circuit identification facilities, enabling proper installation and maintenance.

PZ30 is a 9mm modular modular distribution box, which is a low-voltage terminal power distribution equipment. It is suitable for AC 50Hz, 220V/380V (single-phase three-wire / three-phase five-wire) ...

Power distribution panelboards are significantly employed for heavy-duty and large-scale applications. However, lighting panelboards, on the other hand, are used as smaller power distribution panelboards.
