

A practical guide to selecting and implementing 25G optical modules, based on network needs and equipment compatibility.

Built on Lumentum's high-volume InP manufacturing platform and GR-468 qualified for long-term reliability, the DML 25G TDM enables simple, compact, and low-power transmitters for 25G SFP28 ...

QSFPTEK offers 25G/40G transceivers with SFP28 and QSFP form factors, enabling cost-effective, high-density, and low-power 25G/40G Ethernet connectivity solutions for data center, distribution ...

Designed to deliver 2.5x the bandwidth of 10G Ethernet with minimal changes to cabling and infrastructure, 25G optical modules strike the ideal balance between performance, power ...

Arista supports a range of 25G copper cables and optical transceivers compliant to IEEE standards and industry MSAs. Arista's 25G connectivity solutions include copper cables, Active Optical Cables ...

For short reach applications, these devices are used with VCSELs and Photodectors for optical transmission over multimode fiber. Typical reach of these applications is up to 300 meters. For long ...

Link-PP 25G SFP28 solutions enable high-speed, low power, and high-density connectivity. Ideal for a variety of applications including data centers, enterprises and high-performance computer networks. ...

The 25G-LR gray optical module uses only a single 1310 nm wavelength, which can support fast and simple site deployment by utilizing idle fiber resources in the existing network.

FS 25G SFP28 optical transceiver solutions offer a wide variety of high-density and low-power connectivity options for 25 Gigabit Ethernet, telecom, and data center.

Westbury Photonics offers a range of 25G optical transceiver modules based on the SFP28 form factor pluggable. Order online today.
