

# Pre-twisted protective strip for Greek ADSS optical cable

A armor rods can protect and provide cushioning to the OPGW cables and ADSS cables. The special design of armor rods makes ensure that opgw tension clamps can not cause undue stress to the ...

ADSS suspension clamp is a heavy duty, versatile, and reliable solution for securely suspending ADSS (All Dielectric Self-Support) aerial fiber optic cable. The versatility of the clamp allows the installer to ...

ADSS pre-twisted wire suspension clamps are mainly used for overhead self-supporting ADSS optical cable lines for hanging optical cables, similar to ordinary suspension clamps.

Installation scope: The optical cable should be led down straight and aesthetically pleasing, and a fixed fixture should be installed every 1.5m-2m to prevent friction between the optical cable and the tower.

Scope of application: Suitable for suppressing the vibration of wires and ground wires on overhead power lines. User guides: (1). The anti-vibration hammer cannot be ...

The pre-twisted protective wire or repair strip can be used as a repair strip to repair the damaged wire and restore its original mechanical strength and electrical conductivity.

ADSS Optical Cables Prestrand Guard Wire Repair Strip Tensile Prestrand Type Resistance Wire Clamp Power Accessories

ADSS pre-twisted wire suspension clamps are mainly used for overhead self ...

The design of single layer pre-twisted wire not only meets the needs of long-term stability and reliability, but also provides economical engineering solutions for users.

ADSS/OPGW pre-twisted wire suspension clamps are mainly used on overhead self-supporting ADSS/OPGW optical cable lines for suspending optical cables, similar to ordinary suspension clamps.

Feature: The grip strength can reach over 95% of cable's RTS without the effects of stress concentration and vibration stress. Components: Inner rod, outer rod, thimble, ground wire, etc.
