

This QSFP-DD/QSFP56 optical transceiver has 4 independent transmit and receive optical signal channels, and the transmission rate of each channel is 50G, thus achieving a total transmission rate ...

Whether it's routers, switches or precise server components, they can be properly protected in an environment that is shockproof, moisture-proof and anti-static.

200G Transceivers by JTOPTICS deliver high-speed optical data transmission and are ideal for data centers, enterprise networks, and telecom applications. Engineered for reliability and scalability, ...

Powered by a rich set of AI/ML security capabilities that extend into an integrated Security Fabric platform, the FortiGate 200G series delivers secure networking that is broad, deep, and automated.

Boost network performance with 200G optical transceivers. Designed for data centers, 5G, and cloud infrastructure, our QSFP56 modules deliver low latency, high reliability, and seamless compatibility.

200G QSFP56 SR4 optical transceiver for short-reach data center links. Delivers high-speed 200G connectivity over OM4 fiber with a cost-effective upgrade path.

With well-equipped lab, all FS custom optical transceivers are produced with high-quality components, offer a five-year warranty and fast shipping. Purchase from nearby warehouses. 30-Day Free Return.

What is the reach, fiber type, connector, and optical modulation for each 200G transceiver type? The table below summarizes the key parameters for the Arista's 200G transceivers.

Learn how a 200G optical transceiver improves network speed, efficiency, and scalability for data centers, telecom networks, and high-performance computing.

Presenting an innovative 200Gb/s transceiver module, purpose-built for 2km optical communication applications. This design strictly adheres to the IEEE802.3bs 200GBASE-FR4 standard.
