

Protection relay selection table Please note before using selection table! number = Number of stages, shots, X = Function supported inputs or outputs O = Function available as option ...

The 350 relay has sixteen Logic Elements available for the user to build simple logic using the state of any programmed contact, virtual, remote input or the output operand of a protection or control element.

The logic provides Relay Word bits that can be used in programmable torque-control equations of the overcurrent element to enable new trip level settings for the cold-loading period.

A fast and selective arc fault mitigation for air-insulated LV & MV switchgear and Relion protection and control relays and sensor technology protect staff and plant facilities for many years.

The A21R is second generation Numerical Integrated Feeder Protection Relay for Traction Application. It consist all the necessary protection and monitoring functions required for traction feeder.

The relay provides main protection for over-head lines and cable feeders in distribution networks. The relay is also used as back-up solidly earthed networks. Once the standard configuration relay has ...

While this is a very useful feature, especially for non-protection-related services such as voice, SCADA, telemetry, etc which are not themselves redundant, it may not of itself eliminate all failure modes ...

Depending on the standard configuration selected, the relay is equipped with three phase-current inputs and one residual current input for non-directional ground-fault protection and current circuit ...

The iDP-210 relay provides both cold load pickup and load encroachment logic. Cold load pickup logic senses when a feeder is being connected after a period of being de-energized.

The SEL-751 Feeder Protection Relay is ideal for directional overcurrent, fault location, arc-flash detection, and high-impedance fault detection applications.

Channel quality reports, shown in Figure 11, include short- and long-term unavailability, and round trip channel delay. Use this information to accurately assess protection and communications system ...

Selection guide for SIPROTEC and Reyrolle: The selection guide offers an overview of the device series of the Siemens protection devices, and a device selection table.

Bulletin 700-HL 2-Pole "Terminal Block Relay" Relay and socket assembled interface modules for high density interposing or isolation applications

As the protected components of the electrical systems have changed in size, configuration and their critical roles in the power system supply, some protection aspects need to be revisited (i.e. the use of ...
