

Residual current protection distribution box assembly

This series of products are widely used and can be assembled into control systems with different electrical properties as required such as air conditioning control box, machine tool transmission ...

These special residual current devices can be recognised by an extension of the type designation („-F"). They meet the requirements of compatibility between RCDs and frequency converters with respect to ...

This also includes appropriate residual current protective devices or residual current operated circuit breakers that will cut the current immediately and safely in the event of a fault.

Ensure precise circuit protection with IEC final distribution solutions supporting safety and operational continuity.

DISTRIBUTION BOX WIV TEMPORARY ELECTRICAL INSTALLATION rical installationis required. They are optionally equipped with gesis® MINI, gesis® CLASSIC, RST® CLASSIC and socket ...

It provide additional protection in area where excessive earth leakage current present. It automatically disconnect the power when an earth leakage current reaches a preset value. RCDs with a sensitivity ...

Consumer Units Distribution box applies to terminal electric equipped with various modular electric for energy distribution, control protection,signal,measurement [Read More](#)

Ultraimmunised residual current and circuit breaker protection device. Compact solution mounted on DIN rails, used to prevent unwanted tripping in electrical installations.

An accurate protection of people and electrical equipment against leakage currents can be achieved by installing Residual Current Devices (RCDs).

The application provides a residual current protection device and a distribution box to reduce the influence of an over-energy interference signal and improve the working reliability of...
