

138 Laser Diodes from 2 manufacturers listed on GoPhotonics. Search by specification. Selected filters - Country : Russia, Page-1.

Fibercom Ltd. was founded in 2005 in Moscow, Russian Federation. Our team specializes in design, development and manufacturing of high power laser diodes NIR (Near Infrared) range using MOCVD ...

The Laser Diode Market is experiencing significant growth driven by technological advancements, expanding applications across various industries, and increasing demand for high ...

Full-cycle company LASSARD conducts all steps of lasers" and laser machine"s manufacture independently. In the town of Obninsk we develop all components for our lasers -- from growing ...

The company has partners across various industries from material processing to medical equipment to laser measurement, providing ultra-compact and highly reliable solutions that can be ...

Leading Russian manufacturer of laser systems, optomechanical products, and components. Full-cycle production, custom solutions, over 1,500 items in stock, showroom demos, and expert services for ...

Journal of Russian Laser Research is based on research carried out under the auspices of the prestigious Lebedev Physical Institute of the Russian Academy of Sciences.

The joint-stock company "NOLATECH" is off-the shelf to consider any your proposals in connection with development and manufacturing of lasers, laser modules, semiconductor optical amplifier, ...

The expanding applications of laser technology across industries such as healthcare, automotive, and communications are key drivers in Russia. Advances in laser sources, including diode lasers and ...

ATC-SD has own unique facilities and performs a full-cycle production of high power laser diodes, arrays and modules, drivers, laser medical devices and diode pumped solid state lasers.
