

Features Harmonious and beautiful color matching. Standardized design, compact structure, strong versatility. The size of the box can be changed according to the demand. The unique characteristic ...

It serves as the central hub for receiving and distributing electrical energy in low-voltage systems up to 380V. Designed for power plants, substations, industrial enterprises, and commercial buildings, the ...

Suitable for use in power systems with AC 50Hz, rated working voltage of 380V, rated current of 630A and below, as power distribution, lighting distribution, and power control.

The XL-21 low voltage power distribution cabinet is suitable for three-phase four-wire systems with AC voltages up to 500V. It is primarily used for power distribution purposes in power plants, industrial ...

It serves as the central hub for receiving and distributing electrical energy in low-voltage systems up to 380V. Designed for power plants, substations, industrial ...

Designed for AC frequency of 50Hz, this electrical distribution switchgear operates at rated voltages of 400V or 660V with a rated current of 630A. Additionally, it supports three-phase three-wire, four-wire, ...

The main distribution box adopts self-design of new components, compact structure, beautiful appearance, easy maintenance, a variety of wiring options for users to choose, it is an ideal ...

XL-21 Low Voltage Power Distribution Panel supports 630A current, certified to IEC60439 & GB standards. Ideal for industrial power plants, substations, and high-rise buildings with IP3X/IP40 ...

What are the key features of the XL-21 power cabinet? Key features include a compact structure, easy maintenance, flexible wiring options, and a front door equipped with a voltmeter and other measuring ...

This comprehensive guide delves into the specifications and standards of the XL-21 power distribution cabinet, providing valuable insights for engineers, facility managers, and electrical ...
