

Bought a Leviton 47693-16P 1x16 CATV Module and after numerous issues, Spectrum showed up and told me that the Leviton doesn't support the power of their signal. So now, here I am trying to find ...

These splitters are designed for applications that operate in the 5 MHz to 2.4 GHz range, which include: Satellite, Digital/HD Cable TV, Broadcast (over the air) TV, CCTV and other general purpose coaxial ...

In this guide, we'll walk you through the different types of coax splitters, the features to look for, and our top recommendations for finding the perfect splitter for your Spectrum cable service.

If you need to connect a modem and receiver to the same cable outlet, use the splitter and additional coaxial cable that's included in your Express Connect Kit. The splitter should only be used if the ...

Learn how fiber optic splitters work, types (PLC, FBT), and uses in FTTH/data centers. Understand signal splitting, key specs, and how to choose the right splitter.

We recommend connecting your modem or Spectrum receiver directly to a wall outlet rather than using a splitter. If you do choose to use a splitter, make sure it's rated at 3.5 dBmV.

Yes, Spectrum offers a coax cable splitter with its internet plans. Spectrum's self-installation (and pro-installation) kits include a coax splitter for internet and TV.

Using a cable splitter for both TV and internet is generally not recommended due to the potential for signal degradation, interference, and bandwidth limitations.

Understanding how cable modem splitters work and the factors to consider will help you make an informed decision when choosing the right splitter for your cable modem setup.

One option that often comes to mind is using a splitter on our cable modem. This article aims to explore the possibilities and limitations of using a splitter on a cable modem, providing you ...
