

Fiber Optic Splice Trays are specifically designed to safely route and store optical fiber and associated splices. Typically, standard splice trays can hold up to 12 splices and can possibly also allow splice ...

Our fiber optic splice trays and boxes provide a secure and organized solution for managing fiber splices in various network environments. These enclosures protect delicate spliced fibers, ensuring long ...

Explore reliable optical fiber splice closures for network deployment. Our closures prioritize reliability, installability, and flexibility.

These aluminum enclosures are designed for high-density splice storage, with emphasis on proper fiber management and versatility of cable port seals and cable tie-down features. FSB enclosures can be ...

The cabinets feature secure, accessible splice trays stacked for easy access and management. The lightweight material of the cabinets makes them easier to install or mount, saving on installation time ...

Corning splice trays use proven designs and fiber organization technology to provide optimum physical protection for fusion and mechanical splicing methods. The trays are engineered for use with indoor ...

With their compact and uniform design, the splice boxes for both the DIN rail and 19" mounting provide ample interior space for the secure connection of fiber optics.

Aerial & Direct Burial Fiber Optic Cable Enclosure with Fiber Splice Tray for Splicing with Fusion splicer with Fusion Splice Sleeves 60mm (Horizontal 48 Strand)

ICC's Fiber Optic Splice Tray is designed to organize and protect fusion splices in structured cabling systems. This model supports up to 24 fibers and mounts inside rack mount or wall mount enclosures.
