

Discover top-tier telecom chassis with modular design, EMI shielding, and IoT monitoring. Find verified suppliers, compare prices, and click to explore customizable options for your network ...

AdvancedTCA is the most widely used open standard for global telecommunications infrastructure. It is also widely deployed in carrier-grade networks, data center roles such as network ...

With over 20 million enclosures deployed and more than 50 years of innovation, Charles is the communications industry's go-to source for enclosed solutions. Combining a consultative approach ...

This line of benchtop development chassis allows the integrators to develop on and test a 3U or 6U OpenVPX module in a safe environment including cooling, power, connectivity and accessibility for ...

AdvancedTCA is an open, modular embedded computing standard originally developed for telecom and networking systems. It specifies chassis, backplanes, power architectures, and robust cooling to ...

Crafted using top-tier metals, the chassis boasts strength without compromising on flexibility. Every curve, every edge is sculpted, keeping in mind the nuances of modern communication devices.

Our chassis and I/O solutions meet open systems architecture standards, including VITA and SOSA-aligned requirements, to allow for scalability, flexibility, and compatibility across a wide range of ...

At Metal Works of High Point, Inc., we often draw on our extensive metal fabrication experience to assist customers in developing manufacturing solutions for challenging or complex designs. The assembly ...

Source premium aluminum Telecom Chassis for your network. Our 19 inch rack mount enclosures offer top durability as a network equipment enclosure. Custom OEM available.

High performance COTS embedded computing systems including xTCA based chassis platforms.
