

# The distribution box can only be managed by

Understanding these differences is critical not only for system reliability and safety, but also for cost optimization and compliance with standards. In this ...

The distribution list is managed on premises. If you have a directory synchronization in place, you will have to recreate the list in Office 365 before you upgrade it.

If there is no on-prem Exchange, I am afraid it's not possible because Distribution groups synced from Local AD to cloud can only be managed in your on-premises environment, and there is ...

A distribution list only sends incoming email to multiple people. A shared mailbox stores messages in one place so the whole team can read, reply, and manage conversations together.

Need to work with Exchange distribution groups? Learn the ins and outs of how to manage them with the Exchange Admin Center and PowerShell.

You can create or mail-enable only universal distribution groups. To convert a domain-local or a global group to a universal group, you can use the Set-Group cmdlet using the Exchange ...

The configuration of the box "Managed By" only allows the entry of one single user object. The attribute is "single-valued" and can thus only save one value as "Managed By".

By default, only one default role assignment policy exists that is applied to all user mailboxes. We go ahead and enable the MyDistributionGroups option so they will be able to manage ...

Note: You can only manage this group in your on-premises environment. Use Active Directory Users and Computers or Exchange Admin Center tools to edit or delete the group.

Three Managers For One Distribution ListManager Can Update Membership ListCheck with OWADefault Role Assignment PolicyIt is the easiest way to check the success of the settings with Outlook Web App. The screenshot below shows an OWA session with an Exchange 2010 Server. The logged in user is the secondary manager Tobias Baier. In the area "Options > Groups > Public Groups I Own" you can see all distribution lists the user can administrate. See more on activedirectoryfaq RedditExchange Online mailbox unable to edit on-prem distribution groupsIt is not possible for an ExOL mailbox user to edit synced distribution groups via Outlook, you need to create them a management role in your on-prem Exchange environment and direct them to the on ...

# The distribution box can only be managed by
