# UK fiber optic cable to homes

We'll explain how this technology works in practice, what it entails to run a fiber optic cable to your home, and what equipment you'll need to keep everything running smoothly.

Ofcom's Connected Nations report finds that 69% (20.7 million) of UK homes now have access to full-fibre broadband, up from 57% (17.1 million) in September 2023.

**What Is Fibre Broadband?** Fibre broadband is a type of broadband connection that uses fibre-optic cables to deliver faster and more reliable speeds than traditional copper-based connections. In the ...

Want to know even more about our connection types? Find out how we use fibre optic cables to connect homes and businesses to our network across the UK.

Fibre broadband network operators in the UK, Openreach, Virgin Media, and CityFibre, are rolling out fibre to the premises broadband across the country.

In late December, Openreach announced that it had reached the halfway point for its fiber broadband rollout in the UK. 12.5 million homes are now directly connected to the independent ...

"Fibre to the Premises (FTTP)" or "Full Fibre"; This means fibre optic cables run directly to your home. Also, look at the speeds listed on your bill; higher speeds generally mean that you have some form of ...

Full fibre broadband is a new generation of internet connection that uses fibre-optic cables all the way from your provider to your home. Also known as fibre to the premises (FTTP), full ...
