

Uruguay Silicon Photonics Technology

QSFP28

Digital diagnostics functions are available via the I2C interface, as specified by the QSFP28 MSA. It integrates 4 data lanes in each direction with 4x25.78125Gb/s bandwidth. The electrical interface ...

The 100G QSFP28 DWDM1 O-BAND Silicon Photonics received a high score of 4.5/5, highlighting its originality, innovation, and customer impact. Meanwhile, the ...

The 100G QSFP28 DWDM1 O-BAND Silicon Photonics received a high score of 4.5/5, highlighting its originality, innovation, and customer impact. Meanwhile, the 800G QSFP-DD CWDM8/LR8 earned a ...

Download the Product Brief 100G QSFP28 xWDM Transceiver Based on Alpine's Patented nCP4(TM) Silicon Photonics Optical Engine

The QSFP28 100ZR module's streamlined design provides high-volume manufacturing capabilities while maintaining high performance and quality. Supports 100Gbps transmission speeds in an industry ...

The company has integrated silicon photonics technology with traditional advantages to create non-coherent DWDM transmission solutions for 100G data center interconnection (DCI) networks.

In the QSFP28 module the DSP is paired with a highly efficient silicon photonics optical front-end and a power-optimized tunable laser, resulting in a typical module power dissipation of less than 5W.

The integration of silicon photonics and advanced laser technologies is driving the evolution of 100G QSFP28 transceivers. These innovations not only improve current performance ...

Optical transceivers are available in many form factors and flavors. The ones shown here are the most in demand by our customers. If you cannot find the exact one that you are looking for or if you have any ...

Explore the differences between silicon photonics and traditional laser technologies in 100G QSFP28 transceivers. Compare performance, cost, and scalability to optimize high-density ...

In the QSFP28 module the DSP is paired with a highly efficient silicon photonics ...

The Intel® Silicon Photonics 100G PSM4 (Parallel Single Mode fiber 4-lane) QSFP28 Optical Transceiver is a small form-factor, high speed, and low power consumption product, targeted for use ...
