

Winnowing Machine Cable Tray

WWA winnower is a compact, reliable device designed to assist in the preliminary cleaning of grain. Its main function is to separate light impurities, such as dust, husks, fine particles, and small organic ...

Inspired by the laminar flow hoods in my microbiology background, which used a pressure differential across a grate to create an even airflow, I set about building a winnowing machine.

These machines clean threshed grains i.e. rice, soybean, guinea- corn, beni-seed and millet. Two types have been fabricated: Motorised reciprocatory Winnower/Cleaner: This cleans grains by using three ...

Vibrating feed tray with adjustable angle and slot width for different seed shapes and sizes. Hopper holds up to 12 gallons of seed, with sliding gate for slow-feed, accurate winnowing or fast-feed, ...

Seed first passes through a screening tray to remove large debris, then into an air chamber where the chaff is winnowed from the seed. Clean seed is collected in one catch pan while the chaff and plant ...

Specializes in Native American art & artifacts from all time periods, with an emphasis on artifacts crafted in the 19th and early 20th century. Navajo Rugs, Indian Baskets, Pueblo Pottery, ...

The seed winnowing machine uses the principle of wind resistance ...

The seed winnowing machine uses the principle of wind resistance to removing the bark, sand, etc. from the grain. What's more, this grain winnower machine is a dual-purpose flashlight.

If seed moves to one side of tray (and machine is level), adjust cable-attachment eye screws to level feed tray and equalize cable tension. Use the two sliders and thumb screws to adjust the gap ...
